## QUEBEC DEFECTION BEATS LIBERAL PARTY

**BENNETT WILL HAVE CLEAR MAJORITY IN NEXT PARLIAMENT**

TOTAL OF 135 SEATS NOW CERTAIN WITH POSSIBLY MORE TO COME—QUEBEC SOLID LIBERAL BREAKS AND 23 OR MORE CONSERVATIVES ARE ELECTED

**STANDING OF THE PARTIES**

Conservatives	136
Liberals	85
U. F. A.	9
Liberal Progressive	2
Progressive	2
Labor	3
Independent and Others	3
In Doubt	5

Total 245

**Dramatic Change**

It was a night of surprises a dramatic night. In many ways it recalled that night of September 21, 1911, when a Liberal government went to the country on strength of the Fielding budget of reciprocity and was beaten by the defection of the famous Liberal block in Quebec, which returned twenty-seven Conservatives. Only three Conservative supporters came out of Quebec in 1917, none in 1921, four in both 1925 and 1926.

Monday the government went to the country largely on the Dunning budget and increased British preference, and Quebec returned 24 Conservatives; New Zealand butter and a restricted American market, being the prime factors in a dairy country.

And to complete the parallel, each finance minister was beaten, Fielding in 1911 in Queens-Lunenburg N.S., by F. B. McMurdy, and Dunning in 1930 in Regina, by F. W. Turnbull.

In the election of 1926, Premier Mackenzie King found himself with 123 Liberal supporters, to which he could add nine Liberal-Progressives, mostly from Manitoba, giving him a comfortable working majority in a house of 245 members. Today Hon. R. B. Bennett has a following of 135 with a possibility of picking up one or two more, from half a dozen seats in doubt. He need therefore look no further for support among the depleted independent groups, and for the first time since the war agovernment goes into office with a clear ready-made majority.

Interests of the next few days will be focussed on Ottawa, where it is to be presumed cabinet making will be the chief pre-occupation of Mr. Bennett and his lieutenants.

Not only has he pledged himself to call a special session to deal with unemployment, but the question of Canadian representation at the Imperial and economic conferences must be speedily decided. His task of cabinet making is simplified by the elevation yesterday of a round dozen Conservative ex-cabinet ministers, as well as the former Conservative leader in Quebec Arthur Sauve. Probably a seat will be found for Hon. H. H. Stevens defeated in Vancouver centre as indeed has been suggested by his successful opponent, Hon. Ivan Mackenzie.

**A. G. BAALIM**  
Liberal Standard-bearer, who was defeated in Monday's voting.

## Dr. Stewart Elected in Lethbridge

### Will Form New Party Results In Government

**HON. R. B. BENNETT**

Leader of the Conservative party which rode into power in Monday's election when Liberal losses in the Maritimes and the prairie west sent the King government down to defeat.

### FOR AGRICULTURAL IMPROVEMENT

Regina, Canada.—The latest estimate by competent authorities of the tangible wealth of the Dominion of Canada, apart from the natural resources undeveloped, amounts to approximately 27 billion dollars. Of this prodigious amount agricultural values make up about 8 billions. It is also estimated by the same authority that out of over a billion and a quarter acres of the land area of the nine Canadian provinces 360 million acres are available for use in agricultural production. This is two and a half times the present occupied area and five times the present improved area of farm lands. In all the provinces with the possible exception of Prince Edward Island large areas are still available for cultivation and while the nature of the soil and climate varies, profitable farming operations of some kind may be developed on all of these lands. A mere superficial consideration of the facts indicates the astounding possibilities for the increase of Canadian wealth through the improvement and development of agriculture, more especially when it is remembered that the breeding of new early-ripening grain, such as Garnet and Reward wheat, is materially increasing the area capable of agricultural development. The other side of the story, however, is not quite so rosy but it is full of encouraging prospects just the same. The advancement of science, especially during the past quarter of a century, has not been lost to the agricultural industry. The rural worker is no longer a peasant. His industry calls for just as much scientific research, just as much co-operation, just as much careful planning and just as much business ability as any other industry in the world. He is subjected also, in a special way, to many conditions which if they do effect other industries do so indirectly—soil quality, climate, etc. Over such conditions the farmer has but little or no control. Even in these matters however the man on the land is making wonderful progress. Old methods are being improved constantly and new methods are being developed. Herein may be found the origin of the World's Grain Exhibition and Conference to be held

### Party Results In Alberta's Voting

Alberta's representation at Ottawa will be somewhat altered this session when parliament meets. Results of Monday's voting will make Alberta's quota as follows:—

Acadia—Robert Gardner, U. F. A. acclamation, unchanged.

Athabasca—J. F. Buckley, Liberal; Liberal gain from U. F. A.

Battle River—H. E. Spencer, U. F. A. unchanged.

Bow River—E. J. Garland, U. F. A. unchanged.

Calgary East—Dr. D. G. Stanley, Conservative; Conservative gain from Labor.

Calgary West—Hon. R. B. Bennett, Conservative, unchanged.

Camrose—W. T. Lucas, U. F. A., unchanged.

Edmonton East—A. U. G. Bury, Conservative; Conservative gain from Liberal.

Edmonton West—Hon. Chas. Stewart, Liberal, unchanged.

Lethbridge—Dr. J. S. Stewart, Conservative; Conservative gain from U. F. A.

Macleod—G. G. Coote, U. F. A., unchanged.

Medicine Hat—Dr. F. W. Gershaw, Liberal, unchanged.

Peace River—D. M. Kennedy, U. F. A., unchanged.

Vegreville—M. Luckovitch, U. F. A., unchanged.

Wetaskiwin—Wm. Irvine, U. F. A., unchanged.

Summary—Conservatives, 4; U. F. A., 9, Liberals 3. Total 16.

Gains—Conservatives, three gains—in Calgary East from Labor; in Edmonton East from Liberals, and in Lethbridge from U. F. A.

Liberals—one gain—in Athabasca from U. F. A.

U. F. A. none.

Labor none.

Losses—Conservatives, none; Liberals one, in Edmonton East to the Conservatives; U. F. A., two in Athabasca to Liberals, and Lethbridge to Conservatives. Labor one, to the Conservatives in East Calgary.

at Regina, Canada, from July 25 to August 6, 1932. Invitations have been sent to all countries to participate, and although it is now two years before the Exhibition and Conference is to take place, eight countries have accepted the invitation and signified their desire to be represented and to make their contributions to the improvement of the world's greatest industry. Grain grows too in practically every crop producing country in the world are reparing exhibits to enter in the competitive classes for the enormous cash prizes aggregating over \$200,000 greater than have ever been offered by any other exhibition of a similar kind. If this World's Grain Exhibition and Conference becomes the means, directly or indirectly, of increasing the value of these enormous land resources of Canada by even the merest fraction of a percent. It will have justified the faith of those in whose mind the idea was first conceived and when this thought is applied to all other participating countries its prospective benefits to agriculture the world over are beyond comprehension.

regime in Quebec.

This system of official licenses for guides has received favourable comment in the French press of Quebec and Montreal.

### SIXTH FORTNIGHTLY CROP REPORT

Rains have been general throughout the Province during the past fortnight, and have created a more optimistic outlook particularly in the southern area where hot dry weather has caused damage to dry land crops. On summerfallow and on irrigated land will be light.

In the central eastern part of the Province fields which escaped serious damage from blowing and cut worms are making excellent progress. In many fields the stand is thin and patchy and reseeded grain is late. There is, however, assurance of ample feed for livestock.

Along the eastern half of the main line of the C.N.R. crops are good. North of this line, west of the C.P.R. from Edmonton to Calgary and in the Peace River district excellent conditions prevail. Plenty of warm weather to hasten maturity is all that is required. Grains in this area will mature about seven days later than last year, while south of Calgary harvest will probably commence slightly in advance of the usual season.

Oats and barley are growing rapidly and many heavy stands are seen. About 50 p.c of oats are headed and practically all of the barley.

Hail has been reported at a number of points, but does not exceed the average.

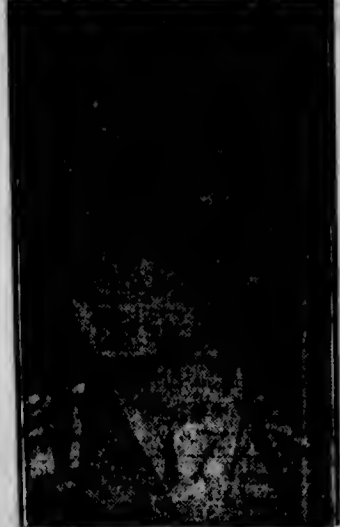

Haying is in progress. Alfalfa is making a very heavy second growth. Pastures are in good condition. Sugar beets are doing well.

### U. S. TO COPY GUIDE SYSTEM OF QUEBEC

Washington, July 30 (Special to the Recorder)—The City of Quebec has a system of examinations for candidates who wish to qualify as historic guides. The observation of George Butler, Vice Consul, the United States Foreign Service. A desire to attract tourists to the city and to give them a favourable impression which will cause them to return, led to the institution of the historic guides. The matter of giving tourists accurate and clear descriptions of the city and its institutions is considered important, and this result is obtained by training official guides.

Courses of study covering a period of several years include the following subjects: Oral and written French and English, history of the Chateau and Fort of Saint Louis, history of the fortifications of Quebec from 1535 to 1914, history and detailed description of the Quebec bridge, industry and labour organizations in Quebec, historic monuments of Quebec, commerce and finance of Quebec, history of Parliament Buildings in Quebec, historical review of French and English Governments in Quebec, description of all historic tablets, natural resources of Quebec, parks of Quebec, descriptions of the furnishings and interiors of country homes, relations between French and English Canadians, the environs of Quebec, educational system and institutions of Quebec, history of constitutional law, the fur industry and fur bearing animals of Quebec, relations between church and state in Quebec, public utility companies history of DuRoi's model of Quebec, Quebec's part in the great war of 1914—1918, history of the highways of the Province of Quebec, streets and public squares of the City economic development of Quebec, public buildings, and history of the seigneurial

### Wins Lethbridge Riding

**DR. J. S. STEWART**

Who won the Lethbridge Federal Riding with a majority of 1,001 in a three cornered fight.

### A RUSTY NAIL

There exists an impression that some particular danger lies in a scratch from a rusty nail. There is danger in any scratch because when the skin is broken, there is always the chance of germs entering and causing an infection. The rusty nail is not much more likely to do harm than a clean nail, excepting that the rusty nail has probably been lying around and so has had a better chance of becoming contaminated. The rust itself will do no harm; it is simply some of the iron of the nail which has become oxidized.

The fear of the rusty nail likely had its origin through persons noticing that wounds made by rusty articles which had been lying around on the ground caused serious infections, and that tetanus or lockjaw sometimes occurred after such wounds.

If nails lie around on the ground, they are almost certain to rust, and if the earth is contaminated with the secretions of animals, there is every likelihood that the germ which causes tetanus will be there and it is also quite possible that some of the soil containing these germs will become attached to the rusty nail.

A wound from such a nail is therefore dangerous, not because the nail is rusty, but because it has attached to it some dirt or manure which contains germs capable of causing infection, and because among these germs will perhaps be found that of tetanus.

Unfortunately for us, the germ of tetanus has the power to form spores. The spore is a sort of resting stage during which the germ is able to resist the conditions which destroy most germs. Because of its ability to form spores, the tetanus germ is able to exist in a soil for long periods of time.

A wound in any part of the body should be promptly and properly treated. The most important point is to cleanse the wound thoroughly with soap and water, and then to cover it with a sterile dressing in order to keep dirt out.

A particularly dangerous type of wound is the punctured wound. In such a wound, the penetration is deep, germs may be carried in quite a long way, and it is difficult, if not impossible to clean out the wound by ordinary washing, as it extends so far below the surface. Wounds of this type should always be brought under medical treatment.

### KING AND BAALIM NECK AND NECK; WINNER POLLS WELL IN THE COUNTRY

DR. STEWART TAKES LEAD OF ABOUT 358 OVER BAALIM IN LETHBRIDGE, BEATING T. O. KING, U.F.A. BY OVER 1,000—CONSERVATIVE VOTE IN COUNTRY POLLS IS SURPRISE, INCREASING MAJORITY FOR DR. STEWART

Dr. Stewart, Conservative candidate in the Lethbridge riding, was elected by a majority over T. O. King, U.F.A., of 1,001 on Monday federal general election. A. G. Baalim, which Monday night was reported to be second on the list, dropped to third place on the re-checked figures and was 1,090 behind the winner, and 89 behind Mr. King. The standing with all polls reported was as follows:

Stewart	4,885
King	3,884
Baalim	3,775

The election brought out 12,504 the largest poll ever recorded in the voters out of a list of some 16,900, for the riding.

Dr. Stewart, the member-elect, first ran for the Lethbridge federal riding in 1925 when he was defeated by L. H. Jelliff, U.F.A., in a straight fight. The majority against Dr. Stewart at that time was 753. In 1926 at the general election of that year, Mr. Jelliff, U.F.A., held the seat by over 1700 majority having Liberal support again at A. B. Hogg, Conservative, at that time.

Dr. Stewart had a majority of 358 over Mr. Baalim in the city, and increased this by over 500 by polling heavy majorities in several of the larger towns including, Taher Cardston and Magrath.

Following the concession of Dr. Stewart's election by Mr. Baalim about nine o'clock, Conservative supporters with a hand at their head paraded triumphantly through the city streets.

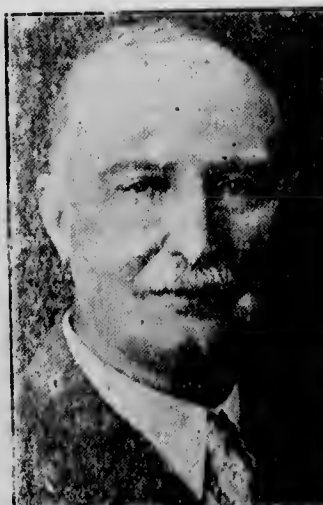

### News Notes

Lou King was in Cardston on Tuesday and Wednesday of this week.

Gordon Brewerton was a Raymond visitor Wednesday of this week.

T. K. Roberts and family were in Lethbridge on Wednesday afternoon attending the Fair there.

One of the heaviest, if not the heaviest votes ever polled in Raymond was recorded on Monday when 536 cast their ballots.

**T. O. KING**

U. F. A. Candidate, defeated in the Voting Monday by Dr. J. S. Stewart Conservative.

### WHY DON'T THEY VOTE?

Once again on Monday was shown a don't care attitude on the part of 4,404 voters in the Lethbridge riding with regard to Canada's National Business. 4,404 names paid for being registered, election machinery prepared for them and then no vote. This was in the Lethbridge riding alone.

It doesn't seem much to stay away from the polls, but if these 4,404 voters had had a cast on Monday it may have changed the entire standing of candidates and even if it did not change the standing it would have made everyone satisfied. As it is, there were enough votes wasted to give a fourth man a bigger vote than either Mr. Baalim or Mr. King received. It is quite likely that all three candidates are wondering what the outcome would have been had everyone voted who had the privilege.

We are wondering what the reaction would be if the next voters list was made up from the voters who used the franchise this year. There may not be any blood spilled, but we are sure that if this happened the government would hear of it in no uncertain terms and those who even suggested such a thing would be ostracized everything but a gentleman. Well should they? We have had the chance, the gates have been opened and like may other heritages that have cost the best blood of our ancestors we esteem the privilege of voting as a thing of naught. When will we make up?

### AND WHAT NOW?

Election day has passed and Canada awoke Tuesday morning to find a Conservative Government in power at Ottawa with a good large majority over all other parties. As to the result of the change, only time will tell, but this much is certain, Hon. R. B. Bennett has a real task before him in the present financial conditions of the country, and if he fulfills all the pre-election promises he made.

The inroads of the Conservative party in getting 23 seats in Quebec as against 4 in the last election proved the undoing of the MacKenzie King Government, and on top of this the gains on the Prairie added to an already large number of Tory seats. The unrest, depression of prices, unemployment and the Dunning budget all offered fronts for the attack of the Tory army and the most was made of them; to such an extent that now, Prime Minister Bennett will be a target for the abuse and ridicule of thousands, yea tens of thousands if the rosy election promises are not fulfilled.

### HUMAN FACTORY

O. e. can compare the body to a Human Factory, says a diagrammatic chart illustrating our physical activities in a recent number of Hygeia, the Health Magazine.

This clever picture shows the brain centres for the control of thought and the automatic functions by means of switch board devices and conferers in various compartments of the skull. The eye is a great camera, the ear is a radio antenna.

Nervous impulses and stimuli go forth from the brain centres via the spinal cord.

The motor system of the muscles and the network of nerves may all be seen ramifying through the great machine of the body.

Of extreme delicacy are some of the workings of the body, and yet one is amazed to find how little care is taken by the majority of people of their priceless possessions.

Teeth are allowed to decay in early life until we find many young people using dentures. Eyestrain is so common that nearly all the world uses glasses before it leaves school. Hearts are subject to fatigue, nerves are allowed to go to pieces through insomnia. Posture of the body is neglected and one sees a poor slouch instead of a fine figure.

All of which is within our own power to remedy. Sickness is largely preventable today. Good Health is your birthright Claim it.

Health Literature available free on request from the Red Cross Society, 407 Civic Block Edmonton.

### RUSSELL NILSSON DEAD

The sad death of Russell Nilsson son of Mr. and Mrs. Joseph Nilsson, occurred on Tuesday morning following a long siege of Typhoid Fever, contracted while he was working on his newly acquired land near Milk River Ridge.

He was the oldest son of the family and leaves besides his parents and a brother and sister, a wife and two small children to mourn his loss.

Funeral services will be held at 2 p.m. Friday in the Stake House.

The family have the sympathy of the entire district in their bereavement.

### DON'T FAIL TO IRRIGATE

Advice from Sugar Co. fieldmen to Beet Growers is to irrigate and not be misled by the recent rain. Moisture tests still show a lack of moisture and J. W. Evans says "Tell the farmers to irrigate just as if we had received no rain. The beets need it and it will make more tonnage."

## Here and There

(564)

Exponents of the Royal and Ancient Game went down to defeat on the Banff Springs Hotel golf course recently when Indian Archery experts played in a nine-hole foursome between two Indian chiefs, Lone Walker and Lone Eagle, and William Thompson, professional on the course, and his daughter, Peggy Dalgleish, former Alberta lady golf champion.

The Indians shot their arrows from the tees while the golfers played in orthodox fashion. The archers "holed in" a four-inch disc standing on end on the cup. Up to the ninth hole the game was tied, but the Indians won the latter with one stroke.

The Plumbers Opera, opening number presented at Banff Springs Hotel by the Alfred Heather Light Opera Company, that is running a summer season at the well-known Rockies resort, proved an unqualified success, while "Tom Tug, the Young Waterman," which followed it, was an even greater hit. The season will run during July and August and a number of 18th century operas with Gilbert and Sullivan and Canadian works will be given.

Sunday, July 20, will see nearly a hundred tourists leave Montreal and Toronto on the seventh annual "Across Canada" tour organized by Dean Slacoff, Laird of Macdonald College, Quebec. They will travel over 6,000 miles in visiting the Pacific Coast, Vancouver Island, Rocky Mountain Parks, the Prairie Provinces and almost every district of outstanding beauty as well as those of industrial and historical interest in Central and Western Canada.

Automatic heat regulation has now been installed for the first time in Canada as regular equipment on railway passenger cars with the introduction by the Canadian Pacific Railway of their new "S" type standard sleepers, constructed at this Angus Shops, Montreal, to the design of the company's experts. Two of them are already in service on the "Trans-Canada Limited."

A bronze memorial tablet marking the house in Fredericton, where Bliss Carman, Canadian poet, spent his boyhood days, has been unveiled by the New Brunswick capital by the Imperial Order Daughters of the Empire, New Brunswick section.

F. W. Bishop, president of the United Fruit Companies of Nova Scotia, stated recently that fruit growers in the province expected a bumper crop of good quality fruit this year. He was of the opinion that this crop would be about 50 or 60 per cent. high grade.

## BETTER BUSINESS TONE EXPECTED TO FOLLOW ELECTION

Ottawa, July 30. (Special to the Recorder)—Irrespective of whether or not the outcome of the election meets with the approval of the individual, there is a nation-wide relief that it is over and that the country can resume business on as broad a scale as home and foreign economic conditions will permit.

An election campaign, with its attendant uncertainties, invariably affects business. It makes a bad business period worse and a good business period poor. There is the uncertainty as to what platform policies leaders will embrace to lure the voter, and then the uncertainty of the effect and time of the application of such policies.

Very seldom in history have the policies of even a new ministry been so revolutionary in nature or so sudden in application as to throw the economic machinery out of gear but, despite that fact, "business" is a decidedly nervous institution that appears willing to shy at any possible innovation.

There is no question but that business in Canada has been badly out of gear this past eight months; and in "business" may be included the basic industries of agriculture, mining and lumbering, as well as industries based upon our raw products, or upon imported materials.

Those who pose as authorities on economics in the Dominion are not the piping times of 1927-28 and early anticipating any overnight return of '29 but they do see improvement on the horizon. The disturbing factor, perhaps, is that the outlook for the back-bone industry of the country, agriculture, is least right. There is the matter of regaining lost overseas and foreign markets. This has to be accomplished in the face of universal depression and against a degree of competition not met for sixteen years. Perhaps it has never been met, for a new factor has entered and that is the intelligent application of cheap labor and the most modern machinery to agricultural production in such countries as Russia.

An aggressive campaign to meet these conditions is to be launched by the Government as soon as the smoke of election battle has cleared away. It will be needed.

Witness "No, Sir. My wife was with me."—Hemlock (London)

Rack and Trumbereaux. "Do you know the motive in the Russian competition they are playing?"

"By the sound I should judge it was revenge."—Boston Transcript.

By-By Nurse. Mr. Jones, had just returned from the office and was introduced to the new nurse, who was astonishingly pretty.

"She is sensible and scientific too," said Mrs. Jones, "and she says will allow no one to kiss the baby while she is near."

"No one would want to," replied Mr. Jones.

"Indeed!" snapped the fond mother. "I mean not while she is near," faltered the father, endeavouring to make things better.

The nurse did not stay long.—Boston Transcript.

## News Notes

L. L. Pack was a Waterton Park visitor on Saturday last.

Mr. and Mrs. D. L. Gilbert are home from their holiday trip now.

Ross Humphreys and Cliff Nakder were at Waterton Park over the week-end.

J. U. Allred was a Cardston visitor on Saturday last returning the same evening.

Mr. and Mrs. M. R. Wolf were in Cardston and Waterton over the week-end returning home Sunday evening.

A light shower of rain with some hail fell here on Friday last, but nothing was damaged.

Mrs. Maurice Cooper, Cardston, spent a few days this week in Stirling and Raymond with relatives and friends.

T. L. Halpin and wife were home Monday to vote. Part of their holiday has been spent at Waterton Park, and they are spending a few days in Calgary.

The following with their wives, spent Friday, Saturday and Sunday, at Waterton Park, Pass Creek and Glacier Park, A. J. Walton, T. W. Meldrum, C. E. Fawn, Reed Litchfield, E. A. Price and Ira McBride. The report a very enjoyable outing. Fishing, hikes and softball were enjoyed.

## Fairy Rhymes Come True

"They diddle, diddle!  
The cat and the fiddle,  
The cow jumped over the moon . . ."

In our childhood days we recited the above as gospel, the world being then new and wonderful where anything might happen. But it remained for the year 1920 to make it partly true with the airplane flight of Scrathmore Hanna Fairchild, prize Holstein calf of the C.P.R. Experimental Farm at Stratford, to Calgary and back. Little Hanna whose mother's half sister is the famous Scrathmore Sylvia with a record of 22,471 pounds of milk in one year, was dead for her journey in a pneumonia jacket. Her feet were secured in a strait jacket placed around her up to the neck. She lay quiet in the plane and seemed to like her trip. Last night shows Hanna who was named after John P. Hanna, secretary of the Calgary Board of Trade, greeted by a number of

leading Canadians at her home on her arrival. Inset shows her passing out of her pneumonia jacket aboard the plane.

## C. P. R. Traffic Appointments

Three important appointments in the freight traffic department of the Canadian Pacific Railway have been announced by George Stephen, newly appointed vice-president in charge of traffic. They are C. E. Jefferson, assistant freight traffic manager, western lines, Winnipeg, (centre of layout), who comes to Montreal as freight traffic manager; H. W. Gillis, assistant freight traffic manager, eastern lines, (right), who is appointed to western lines as assistant freight traffic manager; and Gerald Hiam, assistant general freight agent, Montreal, (left), who becomes assistant freight traffic manager, eastern lines.

Mr. Jefferson entered Canadian Pacific service in 1913 as percentage clerk in the freight tariff bureau, Montreal, and in 1915 was promoted assistant general freight agent, Montreal. He became acting general freight agent in 1921 and general freight agent, western lines, in 1922, and in 1927 he was appointed

assistant freight traffic manager, western lines. His present promotion brings him back east. Mr. Gillis worked his way up in Canadian Pacific service from call boy and messenger in 1905 through the ranks of the freight department in Montreal. From chief clerk in 1915 he was promoted to assistant foreign freight agent in 1919, assistant general freight agent in 1922 and assistant freight traffic manager in 1926. He now goes west in the same capacity.

Mr. Hiam joined the Canadian Pacific Railway in 1904 and after holding several positions in the foreign traffic department, vice-president's office and freight tariff bureau, Montreal, was appointed travelling freight agent, Toronto, and district freight agent, Fort William, in 1911. He went overseas to the war in 1915 and in 1919 was appointed district freight agent at Cleveland, O. He went to Saint John as division freight agent in 1926 and was appointed assistant general freight agent at Montreal in 1928.

#### Notes from the A.C.

Mr. and Mrs. Longman and family have gone on a motor trip down to Yellowstone Park and Glacier.

Mr. Donald Douglas, the Farm Director, was a visitor at the School yesterday. He and Mr. Asplund selected some more calves for feeding from the MacIntyre Ranch herd.

Mr. McDonald, of the Public Works Department, visited the school yesterday for the purpose of seeing what the school needed in the line of repairs. During the afternoon Mr. Asbeson drove him to Coulters where he inspected the New Provincial Police Headquarters.

The Sheep Club Fair, under the supervision of Mr. Asplund was held in connection with the Agricultural Fair at Magrath.

A nine Cylinder 100 horse power Clerget Rotary Aeroplane Englae has been forwarded to the School for instructional purposes in the Mechanics Department.

#### Wedding — Walker — Redig

At 3:30 p.m. on Tuesday, July 15 the home of Mr. and Mrs. Valentine Redig was transformed to a bower of flowers when their daughter Jessie Mayo, became the bride of Kenneth Harold, son of Mrs. F. Walker of Cayley, Alberta.

The beauty and solemnity of the marriage service was enhanced by the fact of its taking place under a gorgeous arch of gallardia and lupine, while large bowls of tiger lilies and sweet peas, the latter the gift of the School of Agriculture at Raymond, Alberta, provided further touches of loveliness. The officiating clergyman was the Rev. T. H. Chapman, rector of St. Cyprian's church Lacombe.

The bride, who was tastefully gowned in a deep maize flat crepe ensemble and carried a large bouquet of roses and lilies of the valley, entered the room to the strains of the wedding march which was rendered at the piano by Mrs. F. Walker. Little Betty MacPhee, a daughter of Mr. and Mrs. J. W. MacPhee of Taber, Alberta, and a niece of the bride, made a charming flower girl.

The bridesmaid was Miss Alice Shearer a college chum of the bride, and the groom was Mr. Lynwood Walker, a brother of the groom. Miss Shearer and Mr. Walker signed the parish register as witnesses.

After the ceremony, a delicious and bountiful repast was partaken of by some fifteen or more guests. Those present from out of town were: Mrs. F. Walker, Cayley, Mr. Lynwood Walker Edmonton, Mrs. J. W. MacPhee, Taber, and Mr. and Mrs. Arthur Northgaves, of Gadsby. Guests from Lacombe included Mr. and Mrs. J. M. Shearer, Miss Alice Shearer and the Rev. T. H. Chapman. Shortly after the luncheon the happy couple left by motor to spend their honeymoon in various parts of the Province.

#### HARNESSING THE SUN

No waving manes, no flashing hoofs mark the passage of the wild herd of solar steeds that thunders across the face of the earth. Noiseless is their stampede yet unending. From dawn to dusk they race around the world—billions upon billions of them—the unbridled horsepower of the sun.

And as the herd passes, there is left upon the earth the imprint of its energy. In the form of coal, of petroleum, of wood and of water power, men utilize a small part of the great power of the sun. Men have even saddled a straggler or two among the solar horses, but the herd itself has scorned the harness of terrestrial chariots.

Of what material can the bonds be made which will link this solar horsepower to the world's tasks? Men have asked this question for centuries. Now a new answer is being offered which may hold the key to direct transmutation of the sun's rays into electricity. Pursuing experiments at the Kaiser Wilhelm Institute of Silicate Investigation, Dr. B. Lange has developed a new type of photo-electric cell. Its element consists of two layers of copper, separated by a minute layer of copper oxide. When light falls on one of the thin pieces of copper, electrons are driven off through the copper oxide, to the other piece of copper. This sets up an electrical current which Dr. Lange has used to actuate very small electrical devices.

Previous efforts to utilize the sun's power have been based on converting the light into heat. In the majority of these systems, mirrors or lenses are employed, focusing the rays upon a boiler which generates energy in the form of steam. Recently at Tunis, the colonial authorities offered a prize for a device to use solar energy to distill sea water and irrigate the desert areas which border on the Mediterranean. This plan was not

successful because the most efficient sun engine was so large that an acre of apparatus was required to irrigate an acre of land.

Yet Dr. C. G. Abbot, of the Smithsonian Institution, a leading figure on solar research in the United States, is convinced that the time will come when the energy of the sun will propel motorcars, light cities, heat homes and cook meals. In fact, he has a "solar stove" in operation at his home with which the family's cooking was done for an entire summer. The sun still remains the earth's greatest potential source of power. The limited experiments of this decade are an important step to its ultimate utilization.—Christian Science Monitor.

#### RAW FOOD FOR GOOD HEALTH SAYS MEDICO

Ottawa, July 24 (Special to the Recorder) "If you want to enjoy really good health, you must eat food that has not been cooked." This was the advice given by Sir Bruce Porter in an address recently. "There is only one vegetable that you can cook with out destroying the vitamins" said Sir Bruce. "And that is cabbage."

"Teach the children to spend their pennies on apples rather than sweets, but don't tell them to eat apples because they are good for them. And if it is a question as to whether father has butter or margarine give him margarine and let the child have the butter."

"The mode of dressing has a lot to do with health, and in this respect women are a lot more sensible than men. I hope they will not allow men dress designers in Paris to get them to return to those things trailing in the dirt."

#### Here and There

(547)

With a view to providing proper encouragement for the very important work being done by Boys' and Girls' Club (clubs) to improve the dairy cattle industry in the province of Quebec, the Canadian Pacific Railway is offering a scholarship to minors of 16 years and over, exhibiting in the Boys' and Girls' Club (clubs) classes at Canada's Great Eastern Exhibition, Sherbrooke, Que., August 25-30 next.

The 1930 International Railway Congress may be held in Canada, with Japan as a possible alternative location, according to information brought back from the 1930 gathering, in Madrid, Spain, by D. C. Tolman, vice-president of the Canadian Pacific Railway, and Sir George McLaren Brown, European General Manager, who together represented the railway at the recent world meet. Every country in the world, except Russia, was represented.

Launched on June 11, at Clydebank by H. R. H. the Prince of Wales in the presence of a distinguished gathering of notables, S.S. Empress of Britain, ace of Canada's steamships, took the water and pictures of the function were flashed across the Atlantic and the speeches radioed and appeared in New York papers. Coupled with the Prince's speech were speeches by Lord Aberconway and E. W. Beatty, chairman and president of the Canadian Pacific Railway.

Canada's largest convention held in Canada's largest hotel came to a successful termination last week when the Ancient Arabic Order of the Nobles of the Mystic Shrine, coming from dozens of cities in Canada and the United States, who had invaded Toronto to the number of close on 100,000, left for their respective homes. The Royal York could not of course fully accommodate them and the Canadian Pacific Railway built "Fex City" of railway coaches for this purpose near the hotel.

Meat and dairy products are increasing in popularity on the daily menu of the people of Canada. The per capita consumption of meat is eight per cent. greater than in 1920 and the total quantity of meat consumed annually in the Dominion has increased 20 per cent. in the last 10 years.

Ontario tops the list of Canadian provinces with fatalities at level crossings during the past three years, according to Arthur Gahoury, secretary-general of the Province of Quebec Safety League. His figures show 71 deaths in 1928; 78 in 1929 and 16 to the end of May, 1930. These compare with 39, 7 and 7 for Quebec in the same periods. This greatly reduced numbers in the case of Quebec are attributable, says Mr. Gahoury, to the observance of the law in that province eschewing upon cars to stop when reaching a crossing, whether a train is in sight or not.

Bright Atlantic silver sea-run salmon are entering New Brunswick angling waters in greater numbers than ever this year, according to reports from wardens reaching the provincial department of Lands and Mines. On the Restigouche river catches of 28 lb. and 25 lb. salmon have been made.
